GREEN BUILDING MOVEMENT IN INDIA

"A green building is one which uses less water, optimises energy efficiently, conserves natural resources, generates less waste and provides healthier spaces for occupants, as compared to a conventional building."

SUSTAINABLE LIVING

Cloud 9 strongly believes in constructing eco-friendly homes to ensure a sustainable living. The project is strategically designed in such a way that it ensures conservation of natural resources to the maximum.

Rainwater Harvesting

Rapidly depleting ground water levels led us to take up this step towards conserving water. The rain water that runs off during the monsoons will be redirected back to river saving it for future generation.

Electricity Conservation

At Cloud 9, we address energy efficiency as one of the top priorities. Built with energy efficient modern technology, conserving electricity through efficient lighting and building automation has never been so easier.

Oxygen Rich Environment

Intricately planned well placed greenery can not only brighten the surroundings but also purify the air. At Cloud 9, we have thoughtfully selected some of the best plants like Areca Palm, Neem, Snake Palm, Tulsi, Gerbera etc. that give away oxygen even during the night-time thereby offering oxygen rich environment to the dwellers.

A WISH FOR UNPARALLELED QUALITY

DOORS

- Main entrance and all other doors, flush door
- Stainless steel handles and locks

BATHROOMS

- Vitrified tiles on floor and walls up to lintel level
- Granite / composite marble basin counters in all bathrooms
